MIND440

SPEECH ENHANCER

Widex mind440 is one of our best hearing aids ever. It provides superb sound quality that is more detailed, natural and as clear as a bell.

The sounds you hear are processed according to your immediate listening situation and your hearing needs and preferences – to give you the ultimate pleasure of hearing.

And mind440 contains the unique Speech Enhancer technology – allowing you to hear conversation in noisy places. The Widex Speech Enhancer is the only noise reduction system to take into account your individual hearing loss.

It also takes the background noise in any situation and minimises it. At the same time the frequencies in which most conversation and speech occur are made more prominent, moving them out of the background noise.

This makes social interaction easier for you as conversation and speech are more clearly and comfortably discernible.

SPEECH ENHANCER

PROVEN USER BENEFITS

Recent laboratory tests using the Speech Enhancer have revealed improved understanding of the spoken word within noisy environments. Participants recorded no corresponding reduction in listening comfort.

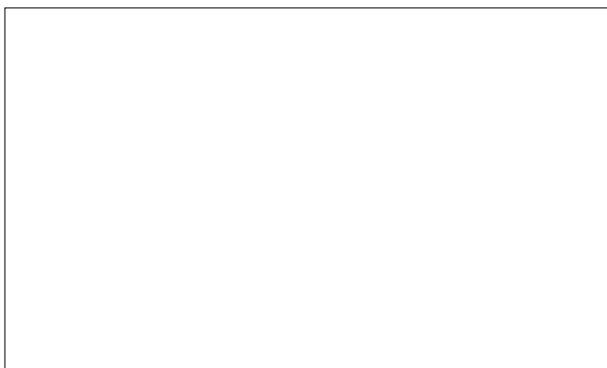

Widex A/S has been supplying the world market with quality hi-tech hearing aids since the company's foundation in 1956. In close collaboration with international audiological researchers and specialists, the company develops a wide range of revolutionary products, including the world's first fully digital in-the-ear hearing aid. Widex' products are sold in almost 100 countries and the company employs approximately 2,000 people around the world.
