

widex mind220™

the pleasure of hearing

WIDEX®
HIGH DEFINITION HEARING

The pleasure of hearing

The mind series from Widex makes hearing a pleasure.

And the mind™220 hearing aids are no exception.

With a range of tried and tested features to help you get the best out of your listening, mind220 is the perfect choice if you want to enjoy the benefits of high-quality sound and proven technology – all at an **affordable** price.

Sounds for you

Hearing high frequency sounds such as birdsong, music or children's speech can sometimes be a challenge for those with a hearing loss.

Our answer to this is the Audibility Extender. This makes **high frequency sounds audible** again.

Speaking to you

Which program are you in? Are the batteries running low? Our unique SmartSpeak system in mind220 uses actual recorded speech to tell you of various functions like these.

So you're always **in control of your hearing aid**.

Relaxing you

We know that using your hearing aid for long periods of time can be stressful. That's why we have developed a relaxation and tone program – Zen. This program, unique to Widex, plays random and harmonic tones that you can listen to at your leisure. And your hearing care professional can change the volume, tempo and pitch of these tones to suit your tastes.

Zen can also be tailored to play a Noise tone that can be useful for managing the effects of tinnitus.

The mind™220 series

Sound pleasure

Like all Widex hearing aids, mind220 provides you with exceptional sound. Our sound technology allows mind™220 hearing aids to react to your listening environment.

Wherever you are, sound coming into your hearing aid is adjusted to ensure that you get the clearest and most detailed sound possible – even in noisy environments.

The only thing you have to do is focus on the **pleasure of the sounds** around you.

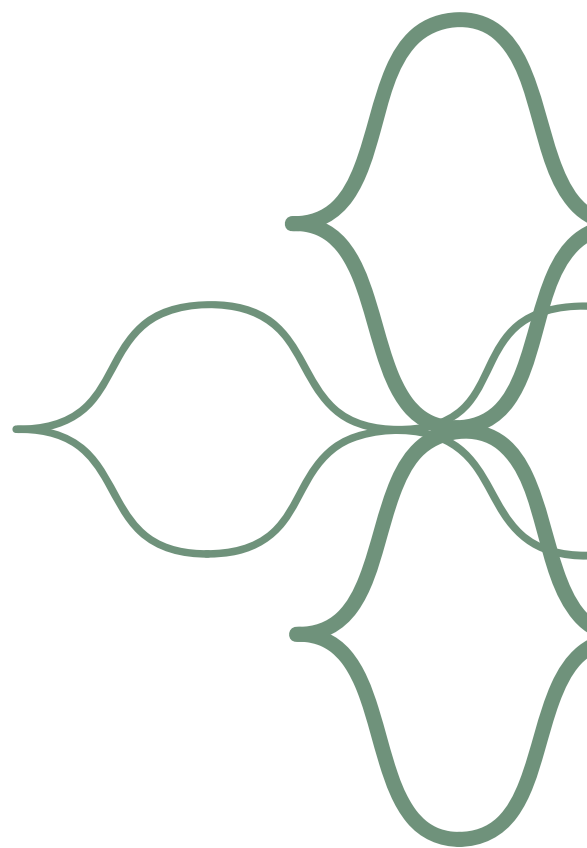

A program for you

mind220 gives you a **choice of listening programs**. Besides the standard program, you can choose from music and TV programs, as well as a comfort program.

Some models also provide a telecoil option. Ask your hearing care professional for more information about listening programs.

A model for you

From Completely-in-the-Canal models to power Behind-the-Ear models, there is a mind220 to suit all types of hearing loss. Your hearing care professional can help you choose the model that **best suits your needs**.
