

WIDEX CLEAR™ 220

STAY IN SYNC WITH LIFE

WIDEX[®]
HIGH DEFINITION HEARING

NATURE HAS
GIVEN US
TWO EARS
DESIGNED TO
WORK
TOGETHER

A WORLD OF **NATURAL SOUND**

The new CLEAR™220 hearing aids from Widex are completely wireless. Like two ears, they can communicate with each other constantly.

With a pair of CLEAR220 hearing aids you can hear all life's sounds naturally and instantaneously.

A range of proven features and all the latest Widex technology make CLEAR220 the perfect choice to get the best of natural sound – all at an affordable price.

CLEAR220 - bringing a world of natural sounds closer.

HEARING AID **MODELS AND COLOURS**

The WIDEX CLEAR™220 series is available in a range of models – four Behind-the-Ear models and two In-the-Ear models.

Shocking pink

Copper brown

Lime green

Pearl white

Sporty red

Metallic blue

Mediterranean turquoise

“I can hear speech
clearly.”

(Male user, 53 years old)

NATURAL SOUND, **INCREDIBLE FEATURES**

With its unique features, CLEAR220 makes it easier to experience a world of natural sound, no matter what the situation:

- Hearing high frequency sounds such as birdsong or music can sometimes be a challenge for those with a hearing loss. CLEAR220 makes **high frequency sounds audible again**.
- Speech can be **easier to hear** as CLEAR220 moves otherwise inaudible sounds into lower frequencies where you can **better understand** them.
- Not only is speech more intelligible, but you can **hear a wide range of sounds** too.
- **Annoying whistling** or feedback is easily dealt with and **eliminated in both ears**.
- A dedicated relaxation and tone program plays a range of random, harmonic tones that can **help you relax**. It can also help **manage the effects of tinnitus**.

FREEDOM OF CHOICE

Enjoying natural sound has never been easier with CLEAR220's range of sophisticated features.

- You can control the direction of the hearing aid microphones so you can **hear sounds behind you** without any problems.
- CLEAR220 uses recorded speech or tones to tell you exactly **what program you are in**, or whether your battery is low.
- Changing the volume in small or large steps is not a problem in CLEAR220. A flexible **volume control** can be adjusted so you always have comfortable sound.

“The Reverse focus feature really works. I can use it when driving my car.”

(Male user, 53 years old)

THE **COMPLETE** HEARING **SOLUTION**

When you combine CLEAR220 with our assistive listening devices, you can enjoy watching television, listening to music or using your mobile – all completely wirelessly.

With the M-DEX, you can connect directly with any mobile phone. So you can talk and hear mobile phone conversations directly in CLEAR220.

And perhaps the best thing about the M-DEX is a unique feature that allows you to turn the hearing aids' microphones off temporarily – so you can concentrate on your conversation without being disturbed by surrounding sounds.

RC-DEX

TV-DEX

M-DEX

With the TV-DEX, high-quality stereo sound goes from your television (or music player) directly to your hearing aid. You can **enjoy uninterrupted sound** for up to ten hours between recharging the battery without delay or echo.

And if you want to enjoy your favourite TV programme without unnecessary background noise, you can easily switch the hearing aids' microphones off temporarily and hear the TV sound only.

The RC-DEX is a **simple to use remote control** that lets you easily control hearing aid functions – such as volume and program.

The RC-DEX is small enough to fit on a key ring.

“I don't need to take my CLEAR hearing aids out when I talk on the phone.”

(Male user, 53 years old)
