WIDEX SUPER™

THE POWER TO HEAR

USER SATISFACTION SURVEY

AUDIBILITY ABOVE ALL

Widex believes that audibility is the key to a successful hearing aid. WIDEX SUPER is the only super power hearing aid to feature power technology such as the Audibility Extender - giving users access to high-frequency sounds.

- Super small, super power
- Gives users the power to hear sounds they may not have heard before
- Helps with orientation and localisation of sound
- All day, all weather solution

For more information about WIDEX SUPER and how it can benefit your clients, visit widex-pro

SUPER IMPROVEMENTS

Until now, substantial improvements in speech recognition in noise have been beyond what could reasonably be expected for hearing aid users with severe-to-profound hearing loss.

However, with the SUPER hearing aid, marked improvements in speech perception in noise were observed in a laboratory trial.*

Results from subsequent real-life trials also indicate that the features included in SUPER to optimise effective audibility have succeeded in increasing the range of both environmental and speech sounds for the great majority of participants.

”Effective audibility is now within reach of people with severe-to-profound hearing loss”

SUPERIOR SPEECH UNDERSTANDING

Self-perceived ability to hear speech in various situations on a scale from 1-10

The strongest preference for SUPER was seen in environments with background noise. This suggests that the features in SUPER that have been designed specifically to optimise hearing in noise do, in fact, perform well for this group.

90%

Ability to hear new sounds with SUPER440

90 percent of users reported being able to hear environmental sounds and/or speech sounds with SUPER that had previously been inaudible to them.

Future preference

90 percent of users responded that they would continue with SUPER.
