HIGH DEFINITION HEARING

CONTROL YOUR HEARING AIDS

THE COM-DEX APP

THE COM-DEX APP

COM-DEX is the stylish, hands-free communication device from Widex that streams high-quality sound to your hearing aids.

And with the popular **COM-DEX app** you can easily control your hearing aids via COM-DEX from your smartphone.

Now, for even more convenience, we are pleased to introduce the Apple Watch™ app. It allows you to discreetly control your hearing aids via COM-DEX at the push of a button, right on your wrist.

Just some of the things you can do:

- Adjust volume settings, change programs or alter sound levels of Widex hearing aids directly
- Choose the direction of the sound with FreeFocus
- See COM-DEX battery status

MORE CONVENIENCE

For those with Android phones, the new Android widget gives you easy access to the COM-DEX app directly from your home screen.

For instance, if you use the ZEN+ program for relaxation or tinnitus management, this will appear on your widget – that’s how easy it is.

IMPROVED PERFORMANCE

You can now connect COM-DEX to two phones. This means that if you have a work phone and a private phone, for example, you can take calls through COM-DEX on either. Or use one for conversations, and the other for music. It’s up to you.

BETTER LOOKING

Choose your own background from a selection of five stylish designs. Available in both iOS and Android versions.
