YOU CAN SHAPE THE WORLD’S FIRST TRULY SMART HEARING AID

Now the quality of your hearing experience can evolve in real time and in real life.

Your WIDEX EVOKE™ offers interactive options that help you intuitively shape your listening experience anywhere, so you can easily take control if you want. And if you don’t want to do a thing? EVOKE™ automatically adjusts to your real-life needs and your real-life environment.

So you don’t miss a single moment.

WIDEX EVOKE™ comes in a wide range of models to suit your needs, preferences and lifestyle.
EVOKE™ knows the difference between classical music and pop music. How a meeting sounds different from a party. And it keeps up with you everywhere – mapping your environment and adjusting accordingly. Since the sounds you’re exposed to are always changing, EVOKE™ automatically reacts to the environment around you – smoothly and in real time.

YOU HELP IT GET EVEN SMARTER

Every time you interact with WIDEX EVOKE™, it improves. Say you personalise your listening experience at your favourite restaurant, for example. EVOKE™ will learn from that. And we will use this anonymous data to keep updating the SoundSense Technology in EVOKE™, so that it gets even smarter as time passes. In other words, the intelligent EVOKE™ you buy today becomes even smarter tomorrow.
EASY. INTUITIVE. TAILORED

Want an even more personalised sound? Teach EVOKE™ how you prefer to hear with a few taps on the EVOKE™ app. The SoundSense Learn function gives you two sound profiles to choose from. Simply listen to them and select the sound you prefer – as many times as you want. It’s never been easier to improve your hearing in everyday, real-life situations.

HEAR EVERY MOMENT

When it’s noisy, you need your hearing aid to filter out anything that can distract from hearing speech. But in quiet situations you want to hear all the subtle details. EVOKE™ has a built-in controller that sets the optimal sound for different sound environments. Now you can experience what’s happening in real life and never miss out.
**LIFELIKE SOUND, NATURALLY**

Every sound has its own “recipe”. And the more lifelike the sound, the easier it is to hear. That’s why we’ve given EVOKE™ the most natural sound you can get from a hearing aid.

**YOU MIGHT FORGET YOU’RE WEARING IT**

EVOKE™ remembers all the volume changes you make and intelligently applies them to similar situations – even if you’re in a totally new environment. With its built-in SoundSense Adapt technology, it’s so intelligent you might eventually forget you’re wearing it!

**ONE PROGRAM TO FIT ALL**

When you’d rather hand over control, try the Universal program and let it automatically adjust to the sounds around you using its built-in Fluid Sound Analyzer and Controller. So if you don’t want to interact with your hearing aid, you don’t have to.
GUIDES YOU TO PERSONALISED HEARING

Refine your hearing in real life by listening to two sound profiles with the app and choosing which you prefer: A or B. The more times you do it, the more EVOKE™ learns about how you want to hear at that moment. You can then save your preferences as a program and use it the next time you are in the same environment.

In addition the EVOKE™ App allows you to:

• Mute or adjust hearing aid volume and use the equalizer to adjust sounds
• Create personal programs with your own names, photos and sound adjustments
• Add locations to programs and locate your hearing aids if lost

The EVOKE™ app is for the EVOKE™ F2 smartphone-compatible model.

TONELINK APP

GIVES EASY CONTROL OF KEY FUNCTIONS

Turn your smartphone into a remote control to easily change programs, adjust volume, and mute and change directional focus. TONELINK’s simple interface is right at your fingertips, and adjustments become a naturally integrated part of daily life. There’s no need to carry separate assistive listening devices or to touch the hearing aids. The TONELINK app is for all EVOKE™ models*.
